

# WE CREATE THE RIGHT PRODUCT FOR YOU

## 1 STUDIES

BECAUSE QUALITY IS OUR PRIORITY, Morgère concentrates on extensive critical studies before putting its products on the market.

## 2 TESTS

BECAUSE EXPERIENCE IS STRENGTH, Morgère relies on the equipment and expertise of the IFREMER to carry out tank tests and study the behaviour of our products. This French institute, research specialist in sea exploration, is a skilled partner in our studies.

## 3 PROTOTYPE

BECAUSE WE DO NOT RELY ONLY ON THEORY, Morgère validates prototypes by demanding off-shore testing. We take into account the constraints of future users in adapting and optimising most closely the doors in actual conditions.

## 4 COMMERCIALISATION

BECAUSE YOU ARE OUR FUTURE, Morgère ensures that proposed product fully meet your expectations for successful fishing. To achieve this outcome, all these stages are necessary to guarantee the quality of our products.

# A HISTORY OF SERVICE TO THE FISHING

SERVING THE FISHING INDUSTRY, MORGÈRE IS ONE OF THE WORLD LEADING SPECIALISTS IN TRAWL DOORS OPERATING ON FIVE CONTINENTS.

Our company has established its position, thanks to continual innovation and the creation of trawl doors resulting from extensive hydrodynamic studies.

Our global experience in very different fisheries, pelagic, bottom fishing, allows us to bring fishing worldwide the most efficient technology, maximising catches at the lowest energy cost.

**1902**  
CREATION  
MARINE FORGE  
IN SAINT MALO

**1930**  
FIRST WOODEN TRAWL

**1960**  
MORGÈRE BECAME THE WORLD STANDARD FOR ONE SINGLE PRODUCT

**1973**  
THE MORGÈRE DOORS TOOK THE PLACE OF HONOUR AT THE WORLD FISHING EXHIBITION IN VIGO, SPAIN

**1996**  
BIRTH TO A NEW GENERATION OF PANELS SHUTTERS

## 2013 « WORKING TOWARDS A FUTURE OF FISHING »

Continuously innovative in our business, WE ARE ALWAYS LOOKING TO PRODUCE A DOOR AHEAD OF THE COMPETITION: Easier to operate, less fuel consumption, less environmental disturbance, better catch, this is the secret of our success.

# OUR PRODUCTS WORLDWIDE RANGE

**DOORS**

**BOTTOM, SEMI-PELAGIC OR PELAGIC,** we manufacture the doors that suits you best for a more rentable and sustainable fishing.

**SHOES**

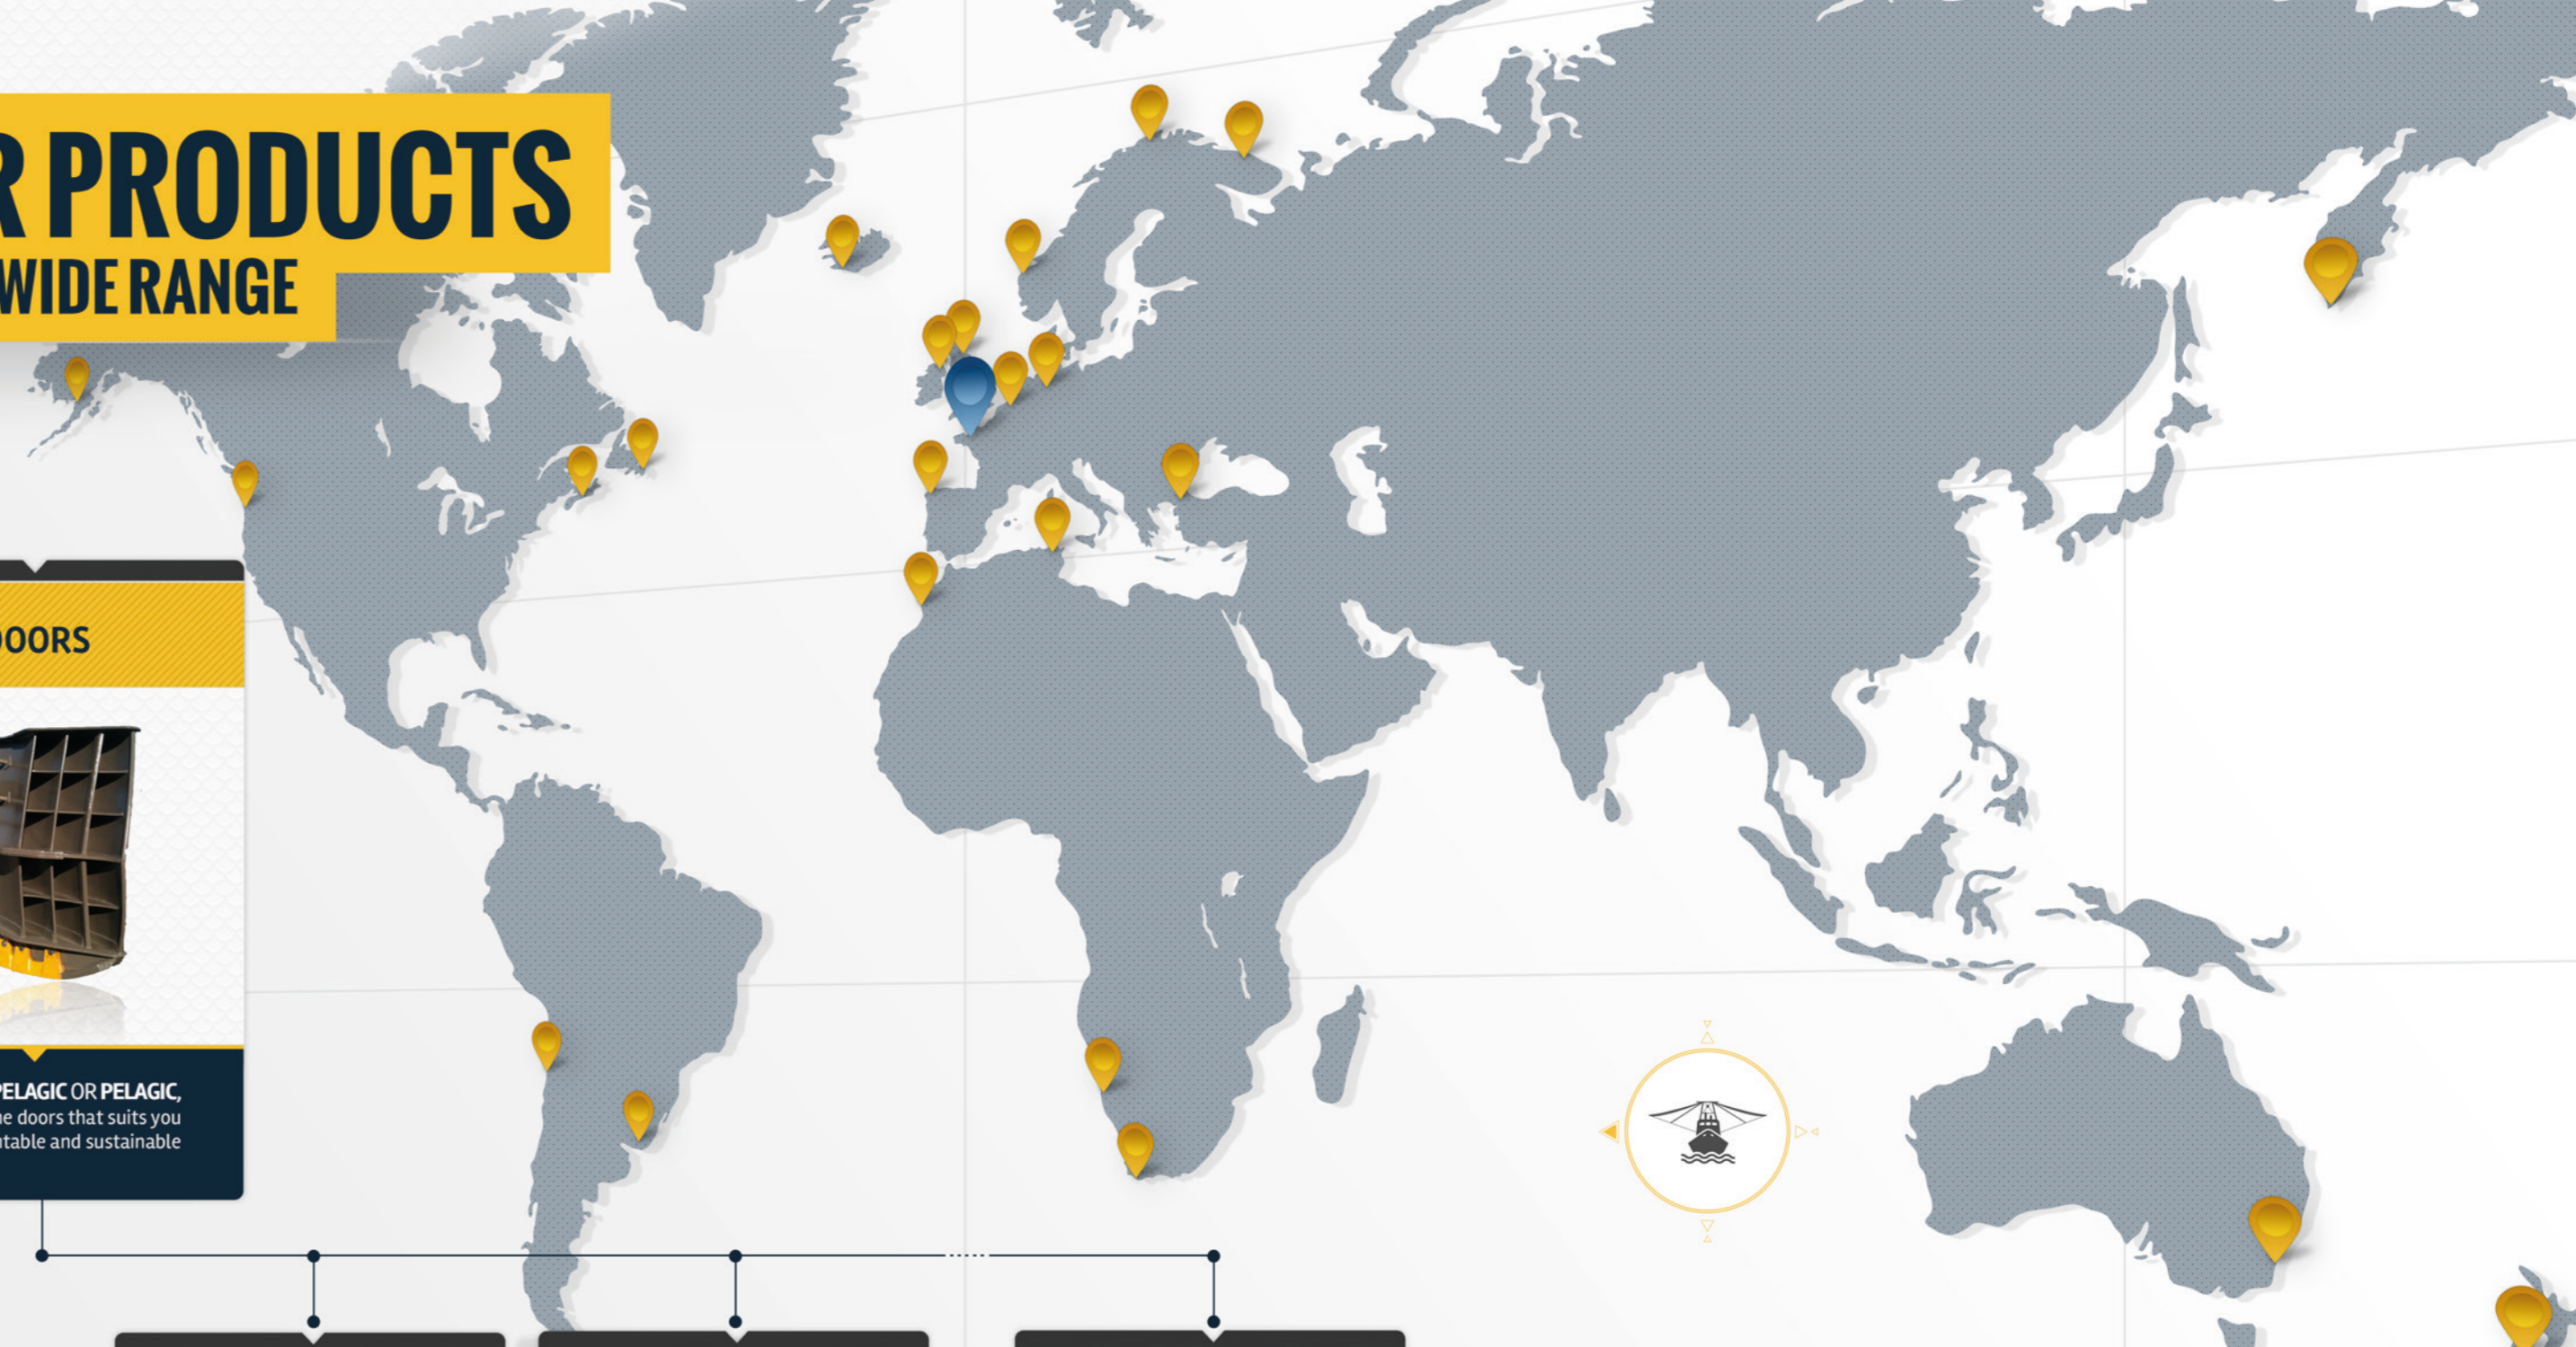

Welded shoes or machine-welded shoes

**CLUMPS**

The Clump is essential equipment for twin trawl fishing. The latest, designed to run on the seabed by exerting a hydrodynamic force, is able to reduce the drag of the fishing gear.

**AEROPLANE**

The Aeroplane works equally well for bottom and pelagic trawling. Fixed on small netting meshes in the middle of the headline, a standard Aeroplane © (1.5 metres) provides the same buoyancy as 35 x 4 litre floats at 3.5 knots, 45 at 4 knots
